

Map Showing Location of Isaac and Jacob Lindsey 1832 Land Lottery Wins

Map from: <http://freepages.genealogy.rootsweb.ancestry.com/~nwga/nwga.jpg>

I marked the map to show where the lots were located. The red dot represents the location of Isaac Lindsey's lottery win (12th District, 4th Section), and the blue dot represents the location of Jacob Lindsey's lottery win (17th District, 1st Section).

<http://freepages.history.rootsweb.ancestry.com/~nwga>

The Act of December 3, 1832 divided original Cherokee County into ten counties; but in the drawing of the Lottery and in the granting of the land and gold lots, they were treated only as in Cherokee. The lots were either 160 acres or 40 acres depending on where they were. There were 4 Sections each divided into Districts then into Lots. (A typical deed might read LL 149-14-1. This would mean Lot 149 in the 14th District of the First Section.) This map is of the original 10 Counties. Numbers are the District Numbers.
